

Data Analyst - Job Description

Job Title: Data Analyst (Junior)

We are seeking a detail-oriented and analytical Data Analyst to join our team. The candidate will be responsible for collecting, processing, and analyzing data to help drive business decisions.

Responsibilities:

- Collect and clean large datasets
- Perform data visualization using Power BI or Python
- Generate weekly and monthly business insights reports
- Work with SQL databases for querying data
- Collaborate with data engineers and product managers

Skills Required:

- Python
- SQL
- Data Visualization (Power BI, Tableau, or Matplotlib)
- Statistical Analysis
- Microsoft Excel

Preferred Qualifications:

- Bachelor's degree in Computer Science, Statistics, or related field
- Knowledge of Machine Learning basics is a plus
